

~~CNG2B: A NOVEL~~ HUMAN CYCLIC
NUCLEOTIDE-GATED ION CHANNEL POLYPEPTIDE

ABSTRACT OF THE DISCLOSURE

The invention provides isolated nucleic acid and amino acid sequences of
 5 CNG2B, antibodies to CNG2B, methods of detecting CNG2B, and methods of screening
 for modulators of cyclic nucleotide-gated ion channels using biologically active CNG2B.
 The invention further provides, in a computer system, a method of screening for
 mutations of human CNG2B genes as well as a method for identifying a three-
 dimensional structure of human CNG2B polypeptides.
